

Wearable Robotics Research Studies for Persons with Walking Disabilities

Seeking volunteers for user studies testing various Prosthesis and Exoskeleton designs

You may be eligible to participate in the following studies if:

- **Prosthesis Studies:** You are an adult lower limb prosthesis user
- **Hip Exoskeleton Studies:** You are an adult stroke survivor
- **Knee Exoskeleton Studies:** You are 8-25 years old with a walking disability that affects the knee
- **Hip & Ankle Exoskeleton Studies:** You are an active able-bodied adult aged 65 years and older

Additional inclusion/exclusion criteria must be screened prior to study enrollment.

We are conducting research to assess user perceptions, human walking and energy expenditure while walking in various prostheses and exoskeletons.
