

Healthy Adults and Stroke Survivors Needed for Neurorehabilitation Study

We are inviting stroke survivors and healthy adults between the ages of 18-85 years to participate in a research study to improve our understanding of post-stroke sensorimotor deficits.

This research will be conducted in the Neural Plasticity Research Laboratory in the Emory Rehabilitation Hospital at Emory University.

If you are eligible and decide to participate, you will complete 2 study sessions, receiving non-invasive stimulation to your brain while recordings of brain/muscle activity are collected, and performing sensorimotor tasks, including robotic assessments. The first lasts 1.5 hrs and the second lasts 3.5 hrs. \$30 gift card per study session.

If you are interested, please contact:
