

Smoke-free Housing Survey

[Date]

Dear Residents:

Apartment building owners are adopting smoke-free policies for a number of reasons. Secondhand smoke is a health hazard, especially for children, the elderly, and persons with chronic illnesses. According to a report from the US Surgeon General, there is no safe level of secondhand smoke exposure, and secondhand smoke can travel from one apartment unit to another. Also, smoking related fires are the leading cause of fire death nationally.

To ensure the health and safety of all persons living here, we are considering adopting a smoke-free policy for our building/s and individual units. We value your input! Tell us what you think about having rules about tobacco use in the building and on the grounds. Please fill out the short survey below and return it to [name of office, etc.].

Sincerely,

[Apartment Manager's name]
