

## Adult Caregiver Study

This study consists of 3 components and you will be compensated \$75.

**1. Caregiver consent and questionnaires (15-20 minutes):** Please complete the study consent form, MRI safety form, and screener questionnaire by following the link and selecting only “**Caregiver providing consent and screener questions.**”

<https://redcap.emory.edu/surveys/?s=R4Y3NK9M89>

After filling out the forms, researchers will notify you if you meet the eligibility criteria to participate.

**2. Your patient consent over zoom (10 minutes):** Schedule a zoom meeting with researchers to review the consent form for yourself and your patient (and patient representative if needed) to provide patient consent for use of photographs for your MRI scan.

- During your functional MRI scan, you will be viewing photos of your patient and a friend. We need to receive consent from your patient or representative to complete this step.

**3. fMRI scan & blood spot sample collection (1 hour):** The section of the experiment will be completed in person at Emory’s main campus. During this visit, you will be asked to complete a functional MRI scan during which you will view pictures of your patient, a family member or a friend whom you do not provide care for, unknown adults and some objects. During this visit, you will also fill out online questionnaires which ask about your relationship with your patient and your overall health. You will be compensated with a \$75 Amazon e-gift card. We are following all COVID-19 related safety precautions for this visit.
