Fair Sex Analyzed
In Experiment
At Tufts

From Tufts college comes this
result from a recent experiment:
An element — woman.
Symbol — member of the human
family.
Occurrence — can be found anywhere
man exists. Seldom occurs
in a free native state. Quality
depends on state in which it is found.
Physical property — all sizes and
colors. Always appears in disguised
condition. Usually covered with
coat of paint or a film of powder.
Boils at nothing and may freeze at
any moment.
Chemical properties — extremely
active. Possesses great affinity
gold, silver, platinum, and precious
stones of all kinds. Violent reaction
when left alone by men. Great
ability to absorb all kinds of
expensive foods at all times.
Sometimes yields to pressure. Some
times green (envy) when placed
near better-appearing sample. Ages
very rapidly. Fresh variety has
magnetic properties. Highly
explosive and likely to be dangerous
in inexperienced hands.
The subject was “Resolved — That
expert jurists, three to five in num-
ber, should be substituted for the
present system of trial by jury.”

Dr. Cox took steps to provide for
better food in the university dining
room.

Med Students Spend
More at Marquette

That the average student at
Marquette University spends over
hundred and fifty per cent more
money on movies than on books
was recently revealed by a master’s thesis on the subject: Extra-
curricular Expenditures of College
Students.”

According to the thesis, only two
cents a week is spent on books
while five cents is used to help sup-
port the moving picture industry.

Another interesting fact noted
that medical students have the
highest weekly expenses and that
journalism students the lowest.

The diction of President Roo-
velt is an example of what a
speech can and should be —
speech of an educated and culti-
vated man. — Prof. Lee E. Bassett.
